SUPER COATED

Maximum comfort and hygiene

50% less joint damage in piglets

INNOVATORS BY TRADITION

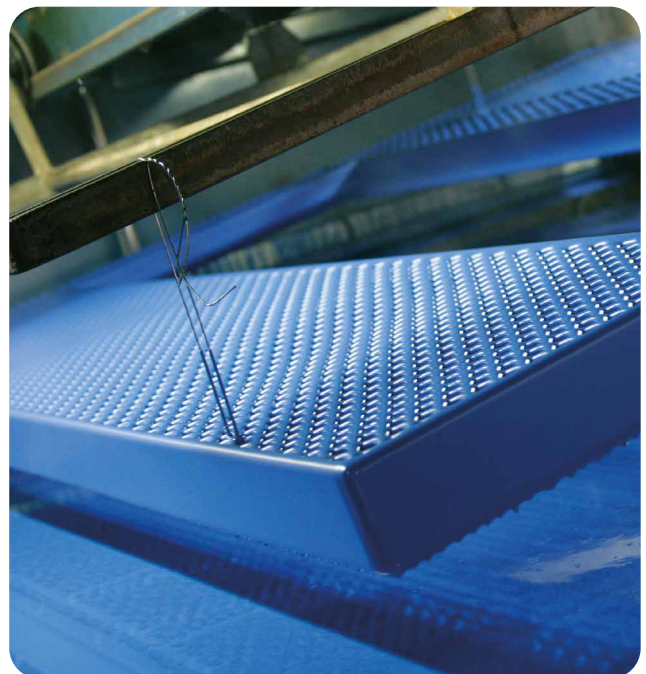

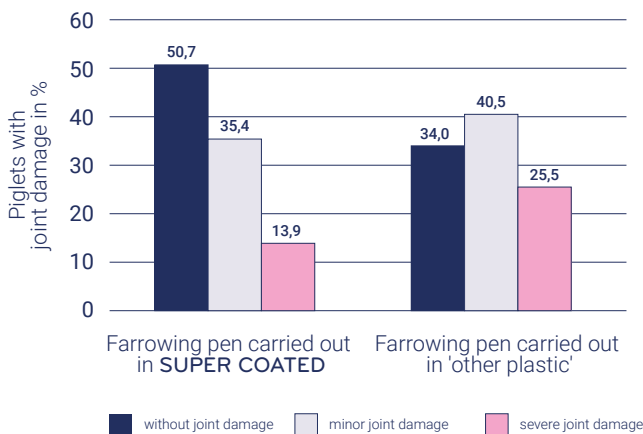

The Nooyen Super Coated slat represents the very best in comfort and hygiene. The high-quality coating feels soft and warm, and prevents injuries to legs and teats.

The Nooyen Super Coated slat therefore means improved animal welfare and significantly better results.

MORE HYGIENE AND LIVING COMFORT

Manure passes the Nooyen Super Coated slat efficiently, guaranteeing hygiene. This soft, compressible coated floor provides more grip, and a significant reduction in knee, joint and teat disorders.

Piglets stay healthy, and are at less at risk of catching infections.

PROVEN RETURN

The weaning weight of piglets with serious joint damage is on average 1.5 kg lower.

A study in 2012 by Hoy and Ruets found that using a farrowing pen floor in Super Coated reduced severe joint damage in piglets by almost 50%.

NOOYEN SUPER COATED	
Material	Super Coated steel
Fire safety	Nooyen Fire Resistant: Fire class EN 13501-1:2007+ A1: 2009 (Bfl - s1)
Hygiene:	The high-quality Super Coated frame, in combination with efficient manure disposal, maximises hygiene
Animal Welfare	▶ The soft coating responds to concerns about animal welfare and reducing the use of antibiotics
Efficiency	▶ 1.5 kg higher weaning weight ▶ 50% less severe joint damage in the piglets
